Forecast for Tuesday 29 Nov 2022

Weather: Dry with clear periods overnight and some low level fog patches. The day will be dry, and though some low cloud and fog patches are possible especially over southern aspects, this will be shallow, so the higher areas will be bright with long sunny spells in the morning, then with thickening high cloud in the afternoon. The low cloud should break up in the evening as winds pick up.

Chance of cloud-free hill tops above 700m: 90%

Low cloud and visibility: Areas of low cloud below 400m likely in the south until evening. Visibility above this generally good, but poor or very poor within the cloud and in fog patches.
